

## Tobacco Treatment Services Patient Referral

To refer a patient for consultation, assessment or a tobacco treatment program, please complete the form below. A tobacco treatment specialist will contact your patient.

Treatment includes education about different methods and techniques for tobacco cessation. The Tobacco Treatment Specialist can recommend appropriate medication during development of the quit plan if needed. Patients will be educated on ways to maintain tobacco cessation habits as well.

Fax completed form to the applicable tobacco cessation specialist listed below. For questions or more information, please call one of the specialists below.
